3.	A large natural-surfaced airfield, approximately three kilometers long and two kilometers wide, begun during early August 1951, is being constructed approximately 20 kilometers south of Provadiya in the vicinity of Dulgopol. The southern boundary of the field, located in a large meadow, is formed by the Kamchiya River.
4.	two other airfields are being constructed in the Provadiya area: one field is located in the vicinity of the Provadiya Rail-road station, and the other is located approximately four kilometers west of Provadiya at Novo Selo village. Both fields will allegedly be used as air-bases for Soviet Air Force units and personnel in the immediate future.
5.	During late August 1951, an unidentified infantry battalion, complement of 8 Infantry Regiment, was transferred from Provadiya to the Bulgarian-Yugo-slav border.

Comment: Grid locations are for the AMS M506 1:250,000 Map Series.
